From there click on the "PRODUCT LINK Hardware Certification" link.

L	508-0797	**PRODUCT LINK, CELLULAR, PL240**	0	NC
		PL240 uses cellular networks to transmit hours and location for to the Product Link's remote monitoring web interface. It is recommended for customer with smaller fleet because it is low cost subscription, low cost hardware and offer very basic features. It does not support integration with onboard data communication links.		
L	509-6603	**PRODUCT LINK, CELLULAR, PL641**	0	$833
		PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitoring performance of your assets, it helps keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet

Availability varies by country, please contact your Cat marketing representative with questions or click on the link below:
HTTPS://DEALER.CAT.COM/en/bt/otd/machine-price-list.html
From there click on the "PRODUCT LINK Hardware Certification" link.

L	508-0797	**PRODUCT LINK, CELLULAR, PL240**	0	NC
		PL240 uses cellular networks to transmit hours and location for to the Product Link's remote monitoring web interface. It is recommended for customer with smaller fleet because it is low cost subscription, low cost hardware and offer very basic features. It does not support integration with onboard data communication links.		
L	509-6603	**PRODUCT LINK, CELLULAR, PL641**	0	$833
		PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

PRODUCT LINK

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitoring performance of your assets, it helps keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet

Availability varies by country, please contact your Cat marketing representative with questions or click on the link below:
HTTPS://DEALER.CAT.COM/en/bt/otd/machine-price-list.html
From there click on the "PRODUCT LINK Hardware Certification" link.

L	508-0797	**PRODUCT LINK, CELLULAR, PL240**	0	NC
		PL240 uses cellular networks to transmit hours and location for to the Product Link's remote monitoring web interface. It is recommended for customer with smaller fleet because it is low cost subscription, low cost hardware and offer very basic features. It does not support integration with onboard data communication links.		
L	509-6603	**PRODUCT LINK, CELLULAR, PL641**	0	$833
		PL641 uses GSM and CDMA 3G cellular networks to transmit location, utilization and condition information for viewing in Product Link's remote monitoring web interface. Cellular technology provides capabilities for frequent transmission and larger volumes of data.

BUCKETS

WORKTOOLS

First worktool must ordered as installed,no packing reference required.
Additional buckets must be ordered as 'not installed' and should include packing reference 0G-3281

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.
Offered with:
1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging.
All 910/914 PS General Buckets share the following characteristics:
Single piece bolt-on cutting edge = 2400mm / 95" wide
8x bolt on adaptors & long tips = 2430mm / 95" wide
Performance Fill Factor = 110% (or 0.1cum/0.2cyd) of stated capacity.
For correct bucket selection see OMM/specalog which shows max material densities per machine configuration per bucket size.

BUCKETS

WORKTOOLS

First worktool must ordered as installed,no packing reference required
Additional buckets must be ordered as 'not installed' and should include packing reference 0G-3281

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.
Offered with:
1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging

All 910/914 PS General Buckets share the following characteristics:
Single piece bolt-on cutting edge = 2400mm / 95" wide
8x bolt on adaptors & long tips = 2430mm / 95" wide
Performance Fill Factor = 110% (or 0.1cum/0.2cyd) of stated capacity.
For correct bucket selection see OMM/specalog which shows max material densities per machine configuration per bucket size

L	471-6764	**FEATURE PACKAGE,ROAD & LOAD,SL**	0	$3,680
		This package includes the following for standard lift linkages 1) Electronic Throttle Lock 2) Automatic Ride Control 3) Variable Speed Creeper Control 4) Electronic Implement Modulation 5) Rim Pull Control(three eletronic settings to select 60%, 80% and 100% full power) 6) Return to Dig 7) Lift Kickout 8) Implement Modulation 9) Hystat Aggressiveness control Electronic Throttle Lock maintains the engine speed at any RPM. adjustable at any time. Creeper Control compliments Electronic Throttle Lock by controlling the ground speed regardless of engine speed. Together these two features are normally used for broom, mower or snow blower applications where high engine speed is needed for the hydraulic power, but ground speed must be slow. Rim Pull Control reduces the amount of tire slip in poor underfoot, preventing excessive tire wear. When the lift is pulled back to a detent, Lift Kickout will stop the loaders arms at a preset height. Implement Modulation increases joystick aggressiveness with three selections on the right console soft touch pad. Similarly, the Hystat Aggressiveness has three selections for shift smoothness and directional change aggressiveness.

BUCKETS

WORKTOOLS

First worktool must ordered as installed,no packing reference required.
Additional buckets must be ordered as 'not installed' and should include packing reference 0G-3281

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.
Offered with:
1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging.

All 910/914 PS General Buckets share the following characteristics:
Single piece bolt-on cutting edge = 2400mm / 95" wide
8x bolt on adaptors & long tips = 2430mm / 95" wide
Performance Fill Factor = 110% (or 0.1cum/0.2cyd) of stated capacity.
For correct bucket selection see OMM/specalog which shows max material densities per machine configuration per bucket size.
