AIMS COMPANIES

Inspect and Clean

AIMS offers Closed-Circuit Television (CCTV) inspection that visually inspects the interior of sewer lines in extreme detail to identify deficiencies and evaluate their condition.

Over time debris collects, resulting in loss of pipe capacity. We use high pressure/high flow water jet nozzles to remove this buildup and dispose of it according to EPA standards.

Combine our assessment and cleaning service with GIS/GPS mapping to increase your location accuracy and improve your decision making process.

NASSCO Certified

INDUSTRIAL & MUNICIPAL APPLICATIONS

- Sanitary Sewer Collection Systems
- Storm Sewer Collection Systems
- Plant Refinery and Process Lines
- CCTV Mainline & Lateral Inspections
- Cross Bore Inspections
- Manhole Inspection
- Well Inspection
- Lift Inspection
- Smoke & Dye Flood testing
- Laser and Sonar Profiling
