# Russian grid is digital target of U.S.

NEW YORK TIMES

WASHINGTON — The United States is stepping up digital incursions into Russia's electric power grid in a warning to President Vladimir Putin and a demonstration of how the Trump administration is using new authorities to deploy cyber-tools more aggressively, current and former government officials said.

In interviews over the past three months, the officials described the previously unreported deployment of U.S. computer code inside Russia's grid and other targets as a classified companion to more publicly discussed action directed at Moscow's disinformation and hacking units around the 2018 midterm elections.

Advocates of the more aggressive strategy said it was long overdue, after years of public warnings from the Homeland Security Department and the FBI that Russia has inserted malware that could sabotage U.S. power plants, oil and gas pipelines or water supplies in any future conflict with the U.S.

But it also carries significant risk of escalating the daily digital Cold War between Washington and Moscow.

In a public appearance Tuesday, President Donald Trump's national security adviser, John Bolton, said the U.S. was now taking a broader view of potential digital targets as part of an effort "to say to Russia, or anybody else that's engaged in cyberoperations against us, 'You will pay a price.'"

Since at least 2012, current and former officials say, the U.S. has put reconnaissance probes into the control systems of the Russian electric grid.

The action inside the grid appears to have been conducted under little-noticed new legal authorities, slipped into a military authorization bill passed by Congress last summer.

The bill granted U.S. Cyber Command, the arm of the Pentagon that runs the military's offensive and defensive operations in the on-line world, the authority to conduct "clandestine military activity" in cyberspace, to "deter, safeguard or defend against attacks or malicious cyberactivities against the United States."

Under the law, those actions can now be authorized by the defense secretary without special presidential approval.

"It has gotten far, far more aggressive over the past year," one senior intelligence official said, speaking on the condition of anonymity but declining to discuss any specific classified programs. "We are doing things at a scale that we never contemplated a few years ago."

The critical question — impossible to know without access to the classified details of the operation — is how deep into the Russian grid the U.S. has bored.

Both Gen. Paul Nakasone, the commander of Cyber Command, and Bolton, through spokesmen, declined to answer questions about the incursions into Russia's grid. Officials at the National Security Council also declined to comment.

Two administration officials said they believed that Trump had not been briefed in detail about the steps to place "implants" — software code that can be used for surveillance or attack — inside the Russian grid.

Because the new law defines the actions in cyberspace as akin to traditional military activity on the ground, in the air or at sea, no such briefing would be necessary, they added.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY  
NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN WATER QUALITY PERMIT

PROPOSED PERMIT NO. WQ0015783001

**APPLICATION.** Harris County Municipal Utility District No. 43, c/o Hutton Andrews Kurth, LLP, 600 Travis, Suite 4200, Houston, Texas 77002, has applied to the Texas Commission on Environmental Quality (TCEQ) for proposed Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0015783001 (EPA I.D. No. TX0139220) to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 210,000 gallons per day. The domestic wastewater treatment facility will be located 1.16 miles northwest of the intersection of Cypresswood Drive and Treaschwig Road in Harris County, Texas 77373. The discharge route will be from the plant site to a Harris County Flood Control District ditch; thence to Cypress Creek. TCEQ received this application on April 8, 2019. The permit application is available for viewing and copying at the Barbara Bush Branch Library, 6817 Cypresswood Drive, Spring, Texas. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For the exact location, refer to the application.

<https://www.tceq.texas.gov/assets/public/hb610/index.html?file=300537&line=953633&zoom=13&type=r>

**ADDITIONAL NOTICE.** TCEQ's Executive Director has determined the application is administratively complete and will conduct a technical review of the application. After technical review of the application is complete, the Executive Director may prepare a draft permit and will issue a preliminary decision on the application. **Notice of the Application and Preliminary Decision will be published and mailed to those who are on the county-wide mailing list and to those who are on the mailing list for this application. That notice will contain the deadline for submitting public comments.**

**PUBLIC COMMENT/PUBLIC MEETING.** You may submit public comments or request a public meeting on this application. The purpose of a public meeting is to provide the opportunity to submit comments or to ask questions about the application. TCEQ will hold a public meeting if the Executive Director determines that there is a significant degree of public interest in the application or if requested by a local legislator. A public meeting is not a contested case hearing.

**OPPORTUNITY FOR A CONTESTED CASE HEARING.** After the deadline for submitting public comments, the Executive Director will consider all timely comments and prepare a response to all relevant and material, or significant public comments. Unless the application is directly referred for a contested case hearing, the response to comments, and the Executive Director's decision on the application, will be mailed to everyone who submitted public comments and to those persons who are on the mailing list for this application. If comments are received, the mailing will also provide instructions for requesting reconsideration of the Executive Director's decision and for requesting a contested case hearing. A contested case hearing is a legal proceeding similar to a civil trial in state district court.

**TO REQUEST A CONTESTED CASE HEARING, YOU MUST INCLUDE THE FOLLOWING ITEMS IN YOUR REQUEST:** your name, address, phone number; applicant's name and proposed permit number; the location and distance of your property/activities relative to the proposed facility; a specific description of how you would be adversely affected by the facility in a way not common to the general public; a list of all disputed issues common to you submit during the comment period and the statement "I/we request a contested case hearing." If the request for contested case hearing is filed on behalf of a group or association, the request must designate the group's representative for receiving future correspondence; identify by name and physical address an individual member of the group who would be adversely affected by the proposed facility or activity; provide the information discussed above regarding the affected member's location and distance from the facility or activity; explain how and why the member would be affected; and explain how the interests the group seeks to protect are relevant to the group's purpose.

Following the close of all applicable comment and request periods, the Executive Director will forward the application and any requests for reconsideration or for a contested case hearing to the TCEQ Commissioners for their consideration at a scheduled Commission meeting.

The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material water quality concerns submitted during the comment period.

**MAILING LIST.** If you submit public comments, a request for a contested case hearing or a reconsideration of the Executive Director's decision, you will be added to the mailing list for this specific application to receive future public notices mailed by the Office of the Chief Clerk. In addition, you may request to be placed on: (1) the permanent mailing list for a specific applicant name and permit number; and/or (2) the mailing list for a specific county. If you wish to be placed on the permanent and/or the county mailing list, clearly specify which list(s) and send your request to TCEQ Office of the Chief Clerk at the address below.

**INFORMATION AVAILABLE ONLINE.** For details about the status of the application, visit the Commissioners' Integrated Database at [www.tceq.texas.gov/goto/cid](http://www.tceq.texas.gov/goto/cid). Search the database using the permit number for this application, which is provided at the top of this notice.

**AGENCY CONTACTS AND INFORMATION.** Public comments and requests must be submitted either electronically at <http://www1.tceq.texas.gov/epic/eComment/>, or in writing to the Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105, P.O. Box 13087, Austin, Texas 78711-3087. Please be aware that any contact information you provide, including your name, phone number, email address, and physical address will become part of the agency's public record. For more information about this permit application or the permitting process, please call the TCEQ Public Education Program, Toll Free, at 1-800-687-4040 or visit their website at [www.tceq.texas.gov/goto/pep](http://www.tceq.texas.gov/goto/pep). Si desea información en Español, puede llamar al 1-800-687-4040.

Further information may also be obtained from Harris County Municipal Utility District No. 43 at the address stated above or by calling Ms. Brook Pope, P.E., EHRA Engineering, at 713-784-4500. Issuance Date: May 17, 2019
