Notes:

- **Tech Tables** are 29" tall and have a centered trough with flipper doors and brush grommet.
- **Tech Table** trough segments each include 2 plug strips (7 outlets ea.) and 6 data locations (data keystones sold separately).
- **Tech Table Bases** include mounting locations for quad boxes and have access panels for easy vertical cable management.

Notes:

- **Emergency Response Tables** are 29" tall and are modular in design to create the overall size and shape needed.
- **Corner Frames:** Use 85° to create a V table or 90° to create a rectangle table. Corner Surface and Frame angles must match.
- **Linear Surfaces** can span multiple Linear Frames but must align with frame seams (i.e. 1ea. 84" top over 2ea. 42" frames).
- **Linear Frames** include rear storage for quad box mounting and permanently connected laptops and binders.
- **Linear Frames** include hinged rear doors with a cable gap to allow connected devices to transition from storage to surface.
- **Linear Frames** include upper rear trough with power/data connectoin points covered with a flipper door for easy access.

Notes:

- **Conference Table Tops** have color-matched 3mm banding
- **Conference Tables** bases are inset from the ends to allow seating all around.
- **Bases** are black laminate with black edge banding.
- **Tables that are 144" long** have a tight-joint seam and include 3 panel legs. All other sizes are single-piece tops with 2 panel legs.
- **Conference Tables with Power** include one recessed power module for tables up to 120" long and two modules for 144" tables.
- **Power Modules** include 6ea. 110V receptacles and 6ea. Blank data ports.

Add \$1378 per Power Module.
