

Provide a summary of key aspects of the contractor's qualifications and indicate the Respondent's commitment to provide the services proposed and certify that all statements and information prepared and submitted in the response to this Solicitation are current, complete, and accurate; and that the proposed solution for the project meets all the requirements of this Solicitation.

MagneGrip is a 40+ year-old WBE/WOSB certified company specializing in the design, manufacturing, and distribution of commercial and industrial air cleaning products. Our products are 100% American-made directly from our facility in Cincinnati, Ohio.

In 1995, MagneGrip introduced its revolutionary MagneGrip source capture exhaust removal system, featuring a patented magnetic nozzle. This innovative system, unique to MagneGrip, allows for the induction of ambient air while preventing backflow of exhaust fumes into the station. As a result, thousands of our MagneGrip® vehicle exhaust removal systems are installed in municipalities nationwide. Our commitment to innovation and advanced technology has earned us a reputation as an industry leader.

MagneGrip also manufactures the AirHAWK® air cleaning system. Capitalizing on our many years of commercial and industrial air cleaning experience, this unit was specifically designed for exhaust control in the fire/rescue market and is also highly effective in cleaning the air in commercial and industrial applications. MagneGrip was the first and is still the only manufacturer to use a Photo Catalytic Oxidation chamber in its air cleaning systems to remove exhaust emissions continuously, pollutants and provide germicidal protection.

Our original goals and commitment to quality and customer satisfaction are as strong today as when we began manufacturing our vehicle exhaust systems. Those goals include providing systems that protect fire personnel from the dangerous carcinogenic effect of diesel exhaust generated from fire/rescue apparatus.

MagneGrip's direct sales team, along with our network of distributors, are dedicated to providing the highest quality system in the most affordable manner. We stand behind our user-friendly system with a guarantee of dependability, reliability, and service, offering the longest lasting, lowest maintenance system on the market. Our exhaust removal and air purification systems have become the safest and preferred products in the fire/rescue industry, a testament to our commitment to customer satisfaction.

As a current vendor for HGAC, we are grateful for the opportunity to serve and hope our history of quality and service speaks for itself. We are eager to continue our partnership and demonstrate our commitment through competitive bids.

The statements and documents in this bid were prepared with accuracy and diligence, and the proposed solution for the project meets all the requirements of this solicitation to ensure a strong relationship with our customers and HGAC-Buy.
