

EXTENDED WARRANTY PROGRAM

Generator and Transfer Switch

There are optional two-year, five-year, and ten-year warranties available on Kohler stationary standby systems and Kohler transfer switches, in lieu of the standard one-year limited warranty. An additional two-year, 6,000 hour, Kohler stationary prime power warranty is also available. Optional warranties commence on the distributor-supervised date of start-up, or may be purchased in the first year from the date of start-up and is retroactive to the start-up date. Optional warranties may be purchased after unit has been registered utilizing the Extended Warranty Purchase Request in the online warranty system.

Please refer to the price list for a specific model to determine what extended warranties are available.

Dollar amounts listed in the pricing bulletin for generator set optional warranties no longer include a Kohler transfer switch. You will need to purchase a separate ATS warranty to cover your transfer switch.

Submit the following documents to register an extended warranty:

- An online registration must be submitted prior to registering an extended warranty purchase request.
- A company purchase order must accompany the request for extended warranties purchased after unit has been shipped.
- Both the invoice & purchase order must be included for extended warranty upgrades (purchase order must include the upgrade fee).

Please refer to the Warranty Policies and Procedures Manual (TP-5180) for the terms and conditions of the Kohler Warranty Program.

UPGRADE PRICING

An upgrade to an existing extended warranty is possible. There will be a one-time fee of \$250.00 list price for this service for each upgrade. To complete an upgrade, please refer to Warranty Policies and Procedures (TP-5180) for qualifying upgrades and procedures. (03/26/2008)

Please refer to the price list for a specific model to determine what extended warranties are available.
