

Executive Summary
Regarding RFP RH04-25
Refuse Handling Equipment
Response Date- November 8, 2024

Plum Creek Environmental Technologies (Plum Creek) is recognized as the premier manufacturer of waste and recycling equipment, setting the benchmark for quality, innovation, and reliability in the solid waste industry. With a focus on meeting the diverse needs of its clients, Plum Creek operates two specialized divisions that together provide a comprehensive range of solutions.

Divisions:

1. PLUM Container:

This division specializes in manufacturing an extensive line of containers designed for efficiency and durability. Products include:

- Roll-off containers
- Front-load and rear-load dumpsters
- Scrap containers

PLUM Container's offerings cater to a wide variety of waste management needs, ensuring versatility and reliability for customers.

2. K-PAC Compactors:

K-PAC Compactors provides a full line of stationary and self-contained trash compactors. K-PAC is backed by an experienced service team and a well-stocked parts inventory, ensuring prompt support for all members of the HGACBuy network, a trusted cooperative purchasing program.

Manufacturing and Dealer Network:

Plum Creek operates manufacturing facilities in West Point, MS, and Seabrook, NH, strategically located to serve customers across the United States. The company's nationwide dealer network ensures that Plum Creek's products and services are accessible, no matter the location.

Support Services:

Plum Creek Environmental Technologies stands out for its robust after-sales support:

- **Complete Parts and Service Availability:** An extensive inventory of parts and a highly trained service team ensure uninterrupted operations for all customers, particularly HGACBuy members.

- Comprehensive Dealer Coverage: The company's experienced dealer network spans the entire United States, offering local expertise and support.

Plum Creek is more than just a supplier; it is a "one-stop shop" for the solid waste industry, providing end-to-end solutions that include manufacturing, service, and parts support.

We certify that all statements and information supplied in Proposal RH04-25 for Refuse Handling Equipment are current, complete and accurate. Our submitted proposal for this project meets all of the requirements of this Solicitation.

Plum Creek is an active member of the National Waste & Recycling Association (NWRA).
