

CL8100

CONTAINER SIDE LOADER

CHOOSE EITHER STREET-SIDE OR CURBSIDE LOADING

The G-S Products CL8100 Container Side Loader is designed to meet the needs of customers where container use is a must. The CL8100 is manufactured with our industry proven stable horizontal unloading and heavy duty container lift system. With our universal design, you can choose from right or left side lift mounting. The CL8100 can handle a commercial container up to four cubic yards and has a lift capacity of 4200 lbs.

**Available in 20 to 37
Cubic Yard Capacity
in Single, Tandem, and Tri-Axle**

Designed, engineered and built for ease of operation

**Compact lift system is designed
to handle tight alley pickup**

**Lowest industry dump height at
just 14' with a lift capacity of
4200 lbs.**

**One person operation allows for
a safer and more efficient route
pickup**

Owners and operators contribute to the highly productive CL8100.

The **CL8100** is the most rugged refuse/recycling body built. Our designers spent countless hours with owners and operators to obtain their thoughts and opinions on what makes a great solid waste container side loader. We have taken this information to our engineering department to build what we believe is the most versatile unit on the market.

We start with a safe and stable horizontal unloading system. Second, our container lift arm is located so the operator has a clear view of it and the container. Other features include simple uncomplicated controls and LED body and work lights. The **CL8100** is designed for maximum legal payloads. Our bodies are built in 20 to 37 yard capacities, with many custom configurations available in a simple, easy to maintain unit.

**Schedule an on-site demonstration for your
routes. DEMO HOT LINE: 877-445-4499**
