3000 Series 1500 Lbs. Holding Force Electromagnetic Locks

The 3000 Series is a full size 1500 lbs. holding force electromagnet. It is designed for life safety and high security on rated or nonrated doors and frames. Specify for commercial, industrial, or institutional openings where maximum security and durability is required.

All 3000 Series locks are designed for ease of installation with DynaLock's exclusive FasTrak mounting system, field selectable voltage, and convenient wiring compartments. Optional integrated door and lock status sensors allow remote monitoring without the need to install separate "door contacts".

The 3000 Series is offered in single, double, and split armature models for both outswinging and inswinging doors. The coil and housing assembly mounts rigidly to the door frame while the armature mounts to the door in a manner that allows it to pivot slightly to compensate for door irregularities. When the door is closed and the lock is energized the armature is magnetically bonded to the lock face, thus securing the door without utilizing any moving parts.

- High Security
- 12/24 VDC/VAC
- One Piece Housing
- FasTrak Mounting
- Lifetime Warranty
