## FEATURES

9 GPM 34.1 LPM

### BLASTING HEADS

6"-36" (15.2-91.1 cm)

### UHP PUMP

40,000 psi (2,750 bar)

### FRESH WATER TANKS

1,220 gal (4,618 liters)

### WASTE TANK

1,950 gal (7,457 liters)

## OVERVIEW

The Stripe Hog™ SH7500 is a waterblasting and recovery system designed for either asphalt or concrete roadways and airfields. The Stripe Hog SH7500 can prepare to vacate the runway in under 1 minute.

The SH7500 is equipped with ultra-high pressure needle sharp waterblasting jets creating up to 40,000 psi (2,750 bar) and up to 9 gpm (34.1 lpm). It uses ordinary fresh water without chemicals or detergents, along with a vacuum recovery system. Separating water from solids, it processes the reclaimed water for safe and easy disposal of the solid debris.

With a large water and debris tank capacity the SH7500 can stay on the job for several hours before dumping or replenishing with fresh water. An easy-to-use dump system and a remote-control panel in the cab make this truck a one-person operation...saving both time and money.

Our patented bladder tanks allow you to carry both fresh water and debris water in the same footprint allowing you to use the debris collection box for dewatered solid material only, radically increasing up time. The Stripe Hog™ SH7500 is built on a Mack GU432 chassis domestically.

## THE HOG DIFFERENCE

- 98% of spare parts orders are shipped on the same day they are received, resulting in minimal downtime.
- Hog Tech University - Our New Learning Management System is the perfect place for your team members to receive certification and on-going training. Certified Operators maximize the productivity of your truck while maintaining the highest levels of safety at the lowest operating costs.
- Hog Technologies has a team of engineers and over 100 years of combined real-world experience to create the world's best solutions in every product we manufacture.
- 24/7/365 customer support is available with Certified Technicians within 10 minutes in multiple languages.
