40,000 psi (2,750 bar)

FRESH WATER TANK

1,200 gal (4,542 liters)

WASTE TANK

2,400 gal (9,085 liters)

OVERVIEW

The Stripe Hog™ SK3000 is an auxiliary-driven waterblasting and recovery system designed for either asphalt or concrete roadways and airfields.

The SK3000 is equipped with ultra-high pressure needle sharp waterblasting jets creating up to 40,000 psi and up to 7.3 gpm (27.6 lpm). It uses ordinary fresh water without chemicals or detergents, along with a vacuum recovery system. Separating water from solids, it processes the reclaimed water for safe and easy disposal of the solid debris.

With a large water and debris tank capacity the SK3000 can stay on the job for several hours before dumping or replenishing with fresh water. An easy-to-use dump system and a remote-control panel in the cab make this truck a one-person operation...saving both time and money.

Our patented bladder tanks allow you to carry both fresh water and debris water in the same footprint allowing you to use the debris collection box for dewatered solid material only, radically increasing up time. The Stripe Hog™ SK3000 is built on a skid and can be mounted to the chassis of your choice.

THE HOG DIFFERENCE

- 98% of spare parts orders are shipped on the same day they are received, resulting in minimal downtime.
- Hog Tech University - Our New Learning Management System is the perfect place for your team members to receive certification and on-going training. Certified Operators maximize the productivity of your truck while maintaining the highest levels of safety at the lowest operating costs.
- Hog Technologies has a team of engineers and over 100 years of combined real-world experience to create the world's best solutions in every product we manufacture.
- 24/7/365 customer support is available with Certified Technicians within 10 minutes in multiple languages.
